

## Closing Address

**Gavin Ian McLachlan**  
**Chief Information Officer and Librarian to the University**  
**The University of Edinburgh**

Key themes from the day:

1. Trust and using data ethically - just because it possible, does not mean we should do it. Digital is not always the answer. Jarmo said "Do Data Right"
2. Multi-disciplinary and "transdisciplinary" - helps drive Innovation
3. Inclusiveness - Judy - Gender in STEM, WP, SIMD (issues like the Digital Health Divide)
4. Change management challenges and staff happiness (People) Happy staff = Happy students, Happy staff = staff more willing to accept change.
5. Real-world impact: Using data to drive real meaningful impact and results for the world.
